

AUTO SLIDE MAGLOCK

FEATURE

- Magnetic Lock for Auto-sliding Door
- Extremely strong sliding door locking solution.
- It has been specifically designed for automatic sliding door applications where the size of common electromagnetic locking mechanisms create installation difficulties.

MODELS

RD02001: Magnetic Lock for Auto-sliding Door

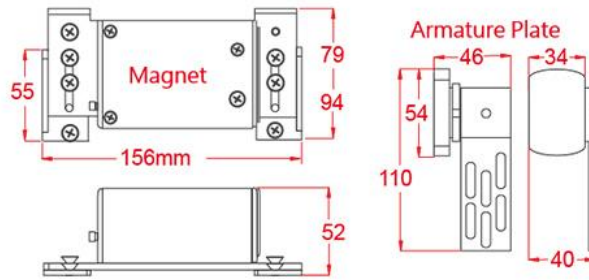

SPECIFICATION

Voltage	AC110V / AC220V
Current Draw	50mA/AC110V, 25mA/AC220V
Holding Force	about 80KG / 175LBS
Input Signal	Remote control, digital keypad, proximity card reader, push button, or any electronic access device.
Output Signal	Signal will trigger NO type relay which will in turn activate motor to open sliding door.
With lock sensor	

DIMENSION

- Magnet: 156L*79W*52H mm
- Armature Plate: 110L*40W*46H mm

APPLICATION
